

# Base Portal

## The big picture of business

### Summary

Base Portal offers several base modules that consolidate and provide shared functionalities across the different solutions of Governance.Business, like Resource Capacity Management, Financial Management, Time Management, a Service Catalog, a Knowledge Base and most importantly consolidate dashboards and reports that provide full visibility and control to the organization.

### Benefits

- Complete visibility in financials across the organization.
- Approval engine ensures standards and practices are consistent.
- Transparent resource requests.
- Lowers Cost of ownership.
- Simple time registration and billing.
- Reduces Re-work.
- Insights in resource bottlenecks.

### Features

#### Financial Management

This module provides a single, real-time view into all financial (both cost and benefit) related to the project / application / product and service portfolio, and overall organization financial planning and execution. Financial planners or Managers gain the flexibility needed to rapidly adjust forecasts as business objectives change. Cash flow analysis capabilities increase the accuracy of investment decisions. Multiple languages and currencies are supported, perfect for global organizations.

#### Resource Management

This module provides comprehensive resource analysis, which includes both strategic and operational activities at any stage in the work lifecycle. This holistic approach enables a complete understanding of where internal or contracted resources are committed. In turn, managers can quickly respond to changes with a clear understanding of the effects on resource capacity and work prioritization.

## Time Management

The Time Management module helps you focus on value-added activities by streamlining time collection and improving efficiency in resource allocation across the wide range of work performed by employees. This provides the capabilities your organization needs to better understand how much time is spent on strategic investments vs. operational activities. This helps improve resource allocation and load balancing along with overall productivity and execution.

## Service Catalogue

The Service Catalogue module makes it easier for your business users to help themselves and to understand the services provided by the different parts of the organization.

- A good service definition will ensure that provider and customer are in alignment.
- Fully integrated processes ensure seamless service from shopping cart to fulfillment.
- Role based workflow helps ensure that the right persons will fulfill the service.

## Reports and Dashboards

The dashboard provides role-based, exception-oriented visibility into different analysis like business trends, status, deliverables to help you execute decisions quickly, financials, roadmaps, activity planning and execution and many more. The dashboard provides a complete set of views in different formats in complete real time.

Additionally an organization can define and execute reports to extract data in different formats like Pdf, Excel, Word, PowerPoint, Html and many others.

This module provides reports for the several solutions of Governance.Business as well as consolidation of information based on the different sources.

## Key Capabilities

Base Portal solution provides the following Key Capabilities:

- Design and Implement your Corporate Service Catalog (IT Catalog, Business Catalog,...) and link it to the right fulfillment service.
- Consolidated views on Financials and the way they are mapped to the several business units and initiatives.
- Track seamlessly every hour spent by your resources in each of the activities that they have performed.
